About Us

Your trusted Odoo Partner — engineering ERP solutions that scale.

OdooVast is an Odoo Partner based in Erbil, Kurdistan Region of Iraq, specializing in end-to-end Odoo ERP implementation, custom module development, and business process automation. We combine deep Odoo technical expertise with real-world business understanding to move clients from disconnected manual operations to a single, integrated digital backbone.

Our Mission

To make world-class ERP technology accessible, affordable, and fully usable for businesses across Iraq and the region — replacing ageing digital systems that lose time and money with measurable, automated processes.

Our Vision

To become the leading Odoo partner in the Kurdistan Region and Iraq — the first name businesses think of when they decide to digitize, automate, and grow with ERP.

AT A GLANCE

ROLE

Odoo Partner

BASED IN

Erbil, Iraq

FOCUS

End-to-end ERP

PLATFORM

Odoo 19 / Odoo.sh

LANGUAGES

AR · KU · EN

When I founded OdooVast, the goal was simple: build a partner that businesses could rely on for their digital backbone — not just to install software, but to truly understand how operations work and engineer systems that fit.

Today, OdooVast serves trading, manufacturing, distribution, retail, and service companies across the region, delivering Odoo ERP implementations that turn manual chaos into clean, automated, measurable processes.

We don't believe in one-size-fits-all. Every implementation is tailored, every module configured for the exact way our clients work — and every customization engineered to be maintainable for years to come. That's the difference between an implementer and a true Odoo Partner.

— Mohammed Widad

What This Means For You

As an Odoo Partner, we have direct access to Odoo Enterprise, official training, and the global Odoo community. Our team works on the latest Odoo versions, follows Odoo's engineering standards, and delivers modules built for long-term maintainability.

Latest Odoo Versions

Always on current Odoo Enterprise releases.

Certified Engineering

Modules follow Odoo best practices.

End-to-End Coverage

Analysis to go-live and ongoing support.

Local + Regional

Erbil HQ, serving Iraq and the region.

Custom Development

Python, OWL, XML, and Studio expertise.

Long-Term Partnership

We stay with you well beyond go-live.

05

FRONT-OFFICE SYSTEMS

Streamline how you sell, source, and serve — from quotation to delivery, every step tracked in real time.

Odoo Sales System

Quotations, sales orders, customer portal, e-signatures, recurring contracts.

Odoo Purchase System

RFQs, vendor pricelists, purchase agreements, three-way matching.

Odoo POS System

Multi-shop point of sale, offline mode, loyalty, integrated hardware support.

Distribution System

Multi-step delivery routes, fleet management, last-mile tracking.

06

MANUFACTURING & INVENTORY

Take full control of production and stock — from bill of materials to finished goods, unified in one real-time system.

Odoo Manufacturing

BOMs, routings, work centers, MRP scheduling, quality control.

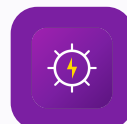

Inventory Management

Multi-warehouse, lots, serials, expiry, putaway and removal strategies.

Warehouse Operations

Barcode picking, packing, transfers, real-time stock dashboards.

Process Automation

Auto-reordering, demand forecasting, scheduled workflows.

07

ACCOUNTING & WEB

A complete digital finance and online-presence layer — books, payments, and storefront in one connected system.

Odoo Accounting

Multi-currency (IQD/USD), IFRS reporting, bank reconciliation, tax.

Financial Reporting

P&L and balance sheet, real-time cash flow, custom KPIs and dashboards.

Odoo Website Builder

Drag-and-drop pages, blog, multi-language, built-in SEO tools.

Odoo E-commerce

Online catalog, payment, shipping, customer B2B/B2C accounts and portals.

08

REPAIR & MAINTENANCE

End-to-end service operations — from customer-reported issues to scheduled preventive maintenance, fully traceable.

Odoo Repair System

Repair orders, RMA, parts consumption, customer notifications.

Maintenance System

Preventive and corrective plans, equipment KPIs, asset lifecycle.

Spare Parts Inventory

Stock for spare parts, traceability, lots and expiry tracking.

Mobile Field Service

Technician mobile app, GPS, signed digital service reports.

09

HR & PAYROLL

Manage the entire employee lifecycle — hiring, attendance, leave, performance, and payroll in one compliant platform.

Employee Management

Profiles, contracts, documents, skills, org chart and directory.

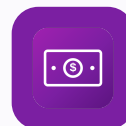

Attendance

Biometric and geo-fence, kiosk, shift and overtime tracking.

Time Off

Leave types, balances, approval workflows, holiday calendars.

Payroll

Salary rules, allowances, deductions, end-of-service settlement.

Beyond Standard Odoo

Standard Odoo covers most typical business needs. The remaining edge cases are where most ERP projects struggle — and where OdooVast specializes. Our engineering team delivers customizations that feel native to Odoo, follow Odoo coding standards, and stay upgrade-friendly across versions.

Odoo Studio Customization

- Custom fields, models, views
- Automation rules & scheduled actions
- Custom reports and dashboards
- Quick iterations without code

Odoo Module Development

- Custom Python modules
- OWL frontend components
- Inheritance and overrides
- Deployable on Odoo.sh and Online

Odoo Integration

- WhatsApp Business API
- Payment gateways (local & global)
- Mobile apps (REST / JSON-RPC)
- Third-party ERPs and legacy systems

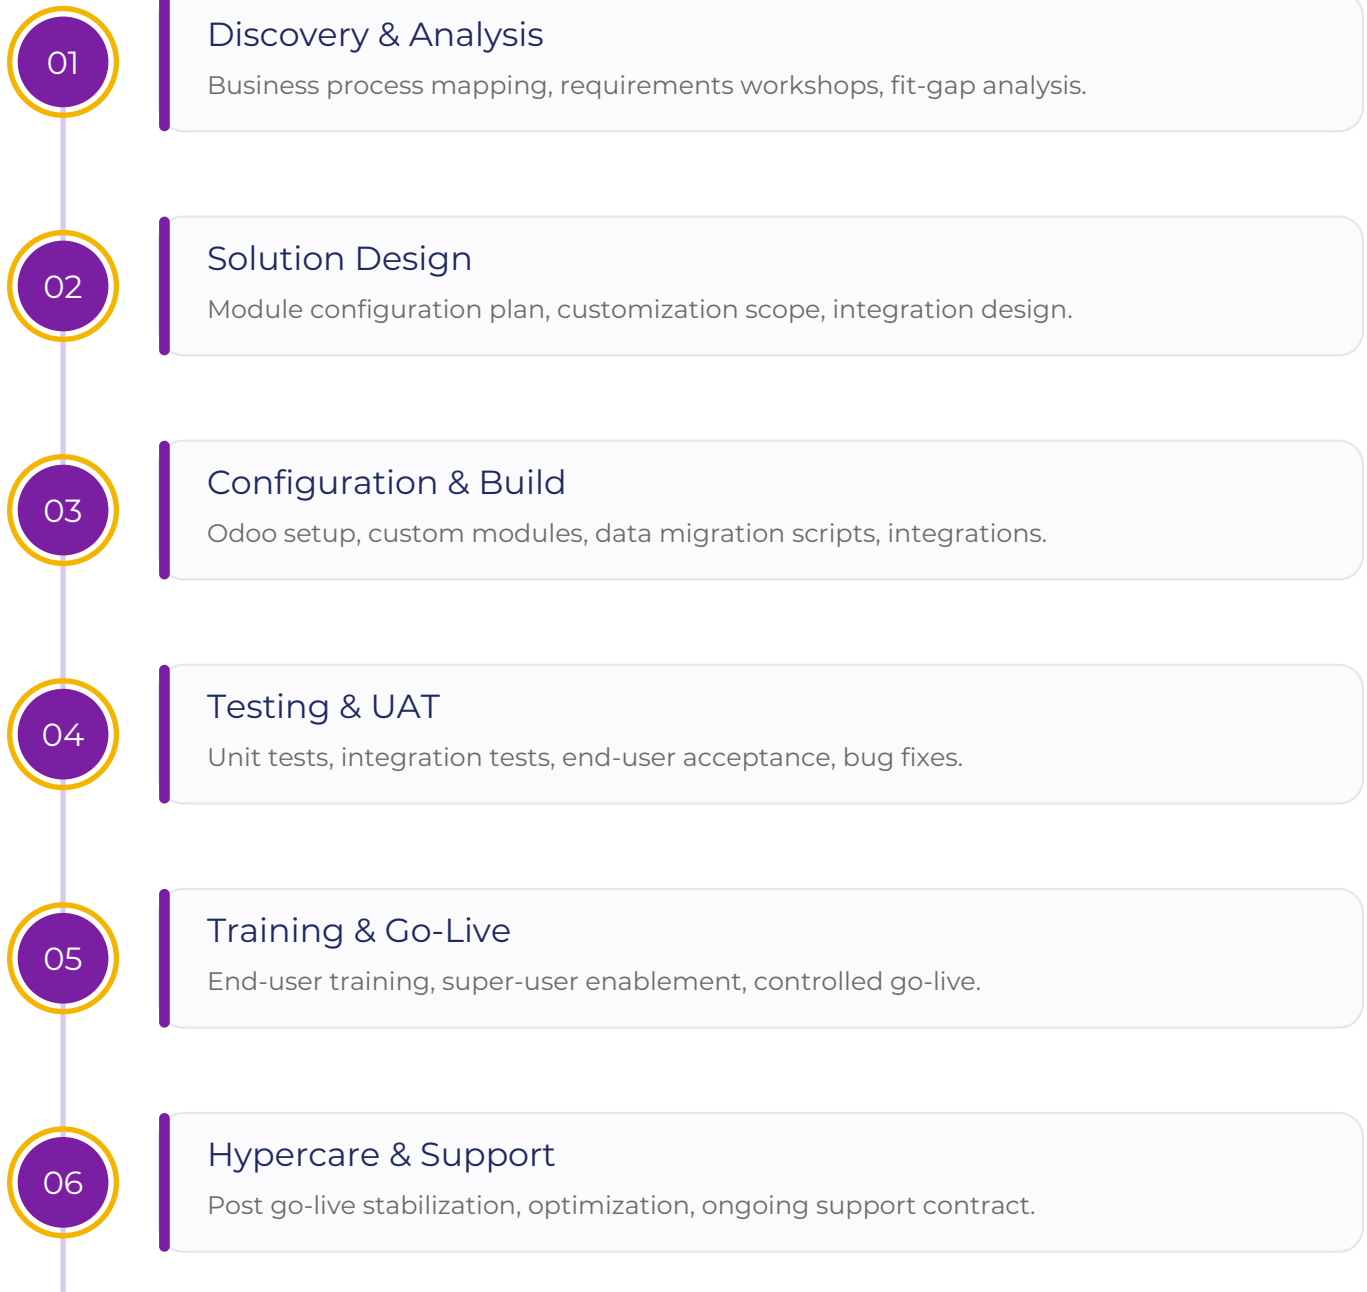

Reports & Dashboards

- Custom PDF report templates
- BI-driven dashboards
- Multi-company consolidation
- Real-time API monitoring

Our Implementation Methodology

A proven, phased implementation approach designed to de-risk your Odoo project. Every phase has clear deliverables, sign-off, and stakeholder alignment.
